Introduction:

CDGI offers a certification Programme to guarantee each student's entire development. Understanding the basic knowledge of STATISTICAL PACKAGE FOR SOCIAL SCIENCE (SPSS) is necessary for MBA students to successfully complete this certification Programme. SPSS statistics is a software package used for logical batched and non-batched statistical analysis. This software is one of the most popular statistical packages which can perform highly complex data manipulation and analysis with simple instructions. SPSS can take data from almost any type of file and use them to generate tabulated reports, charts and plots of distributions and trends, descriptive statistics and conduct complex statistical analyses. This package of program is available for both personal and mainframe computers..

Objective:

This certification course's primary goals to investigate logical information related to sociology. This information can be utilized for statistical surveying, overviews, information mining, and so forth.

Course Outcome:

Upon completion of this course, the student will be able to know basic of

1. Efficient Analysis of Scientific Data for major research project.
2. Transformation of Data
3. Powerful Data Management
4. Statistical analysis
