2. Power supply module: PLC's computer circuitry runs on a 5V DC output and this is supplied by the power supply module. This is essentially the module responsible for powering up the system.

3. I/O Modules: The input/output modules are responsible for connecting the sensors and actuators to the PLC system. It uses the different parameters such as pressure, temperature, and flow.

The I/O modules can be digital or analogue.

21. **Learnings / Take Aways:**

Robotics

1. Typical applications of robots include welding, painting, assembly, disassembly, pick and place for printed circuit boards, packaging and labeling, polarizing, product inspection and testing, all accomplished with high induction speed and precision.

2. They are used in material handling.

VLSI and VHDL

1. The applications include microprocessors in a personal computer or workstation, chips in a graphic card, digital camera or camcorder, chips in a cell phone or a portable computing device, and embedded processors in an automobile.

2. Layout design and fabrication process technique of IC.

3. VHDL programming language used to model a digital system by dataflow, behavioral and structural style of modeling.

22. **Any Other Information/Feedback**

The visit was very helpful. Now student is aware about PLC and Robotics related applications in industry.

23. **Precautions for Next Visit**

1-01

24. **Please paste atleast 2 photographs of the participating faculty. (No more faculty per the student in their class of 10-15)**

Each computer must be networked and connected to the Internet via a firewall or a proxy server.

In addition to the 50 M/c, one Server may be required (one with Windows Operating System or with Linux). The configuration is as follows:

- CPU: Intel PIV or equivalent 2.8+ Ghz.
- Memory: 8 GB RAM
- HDD: 80 GB
- Network: 10/100 Mbps connected to The college backbone
- Monitor: 15 inches
- Keyboard and Mouse
- Backup Device (DVD ReWriter)

Air Conditioner specification: as appropriate for the facility utilized.

Furniture & Fittings: Work stations with side cupboards, projection arrangement (screen + stand), white board, lighting etc.

Power and Back-up: as appropriate for lighting, air conditioning and UPS

Network Security: It would be in the common interest of CDGI and Zensar to protect their computers and authors' work against unauthorized access.

To achieve at least minimum level of network security, Zensar recommends the following components:

- Appliance based firewall (Cisco PIX etc.)
- Internet Proxy Server (Squid, Microsoft ISA Server)
- Antivirus

Other facilities required: Server Placements: The servers and network equipment to be placed in secured enclosure prevent unauthorized access.

Proxy/ Firewall: A firewall must be placed between the internet and the CDGI LAN to allow only legitimate traffic into the CDGI. An appliance based firewall is recommended but CDGI may also opt for software based firewalls, if the number of computers is less.

In case of a large number of users accessing the internet, a proxy server should be used to increase internet performance by caching and also putting in controls required to access the internet.

Printer: Institutions should install at least one printer per batch of 30 students. A network laser printer is most suitable for large networks.

Projector + Screen: A portable LCD projector may be required by the students to discuss and conduct presentations. It should preferably be placed in a discussion room.

Cancellation	2	Post-assessment	44
Drop-outs	4	Pre-CPBFI Interview	42
Regular Students	43	HR Workshop	23
Drop-out Ratio	8.51	Feedback Survey	40

The student participation in the programme is driven by (a) the relevance of the programme in their individual career plans, (b) their understanding and conviction about the programme value and (c) their investment in the programme. A combination of all these factors leads to high participation.

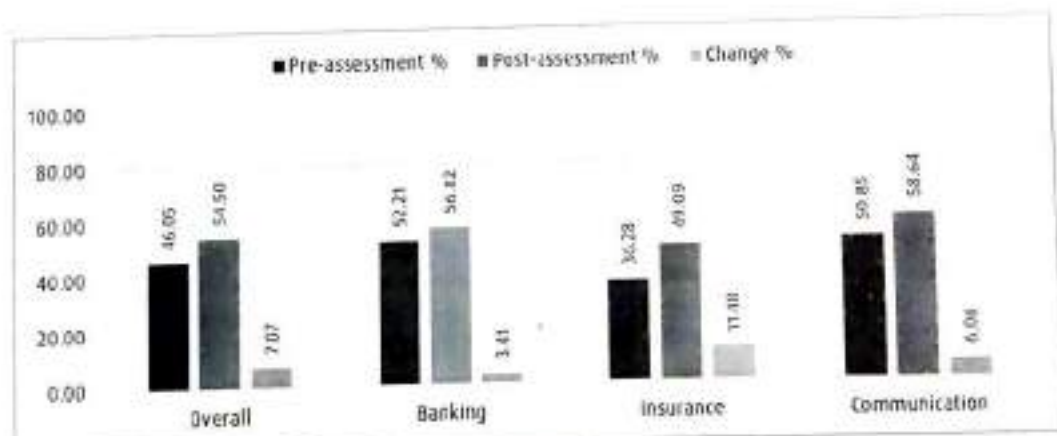

Principal
Chameli Devi Group of Institutions
INDORE

2. Attendance Details

Attendance is driven by (1) certification eligibility criteria (CPBFI requires minimum 65% attendance), (2) training quality, which is a combination of trainer's command over subject, the pedagogy used and students' participation and (3) students' willingness and ability to attend. Non-availability of infrastructure and mandatory college events or family events have a big influence on students' ability to attend.

3. Performance in online Assessment Tests - Average Scores

(# - Performance of students with above 85% and below 85% attendance)

Performance in online assessment tests is driven by the attendance and attentiveness of the students and by the training quality of CPBFI trainers. Students with higher attendance typically perform better than others.

4. Interview Performance

	Attended	Shortlisted	Success Rate
Pre-CPBFI Interview (PCI)	42	10	23.81%
HR Workshop (HRW)	23	17	73.91%

	No. of students	% of total
Attended both rounds	22	
Not successful in PCI but successful in HRW	10	45.45%
Functional skill rating improved	15	68.18%
Personality and Confidence rating improved	12	54.55%
Communication skills rating improved	10	45.45%

Students appear for mock interviews before and after the CPBFI training. The pre-CPBFI interviews are conducted like campus interviews whereas the post-CPBFI interviews during HR Workshop are conducted like real job interviews for a specific role. Students are assessed on different competencies. Shortlisted candidates are considered employable for the industry, meaning they have reached the expected level of employability after CPBFI. The improvement in shortlisting ratio and improvement in ratings in respect of important competencies indicate effectiveness of CPBFI.

5. Student endorsement

Voice of students	% strongly agree
My confidence has improved (Attitude Development)	67.50
My communication has improved (Skill Development)	77.50
My industry knowledge has improved (Knowledge Development)	60.00
CPBFI was the right decision for my career (Overall satisfaction)	82.50

Students join CPBFI with different objectives, so, it is important to seek their confirmation about improvement in their own attitude, skills and knowledge. This confirmation along with HR Workshop performance are key performance indicators of CPBFI.

6. Net Promoter Score (NPS)

Voice of students	% of respondents
On a scale of 0-10 how likely are you to recommend CPBFI to others?	
Very Likely - Promoters - Score of 9 or 10	82.50
Not Sure - Passives - Score of 7 or 8	12.50
Not Likely - Detractors - Score of 0 to 6	5.00
Net Promoter Score = Promoters - Detractors	77.50
Overall Rating - Good (>0), Excellent (>50%), Exceptional (>70%)	Exceptional

Net Promoter Score or NPS is globally regarded as a strong indicator of customer experience and loyalty. For CPBFI also NPS is regarded as an important success indicator.

7. Feedback about Faculty:

Faculty Name	Subject	% of students
Neelam Rose	Banking	75.00
	Insurance	80.00
Jyesh Keshavi	Communication	87.50

% of students that have rated the respective faculty as "Excellent"

Feedback about individual trainers help in assessment of the trainers and their delivery quality. These ratings are used to identify best trainers for each subject and to plan supporting interventions for trainers that are not at par.

8. Comments from Bajaj Finserv CPBFI Team:
What worked well -

- The batch has shown some improvement between PCI 5 HR Workshop. The overall feedback of the batch was also exceptional.

What could have been better -

- There were about 20 students who did not appear for the HR Workshop. They would have learnt a lot from the experience. The passing ratio of the batch was less than 60% and many students have failed because of their low attendance and low improvement in scores. The expectations were high from the students in assessments.

We place on record our appreciation for the efforts put in by the coordinator, Dr. Yashu Keshavi, and other staff in making the batch successful. Overall, the students have completed the programme and we are confident, every one of them has a successful career ahead!

Thank you!

Dear Sir,

Congratulations – your institute has been approved as an AWS academy.

As a next step you need to complete the following steps

1. Accept the Terms and Conditions as the Central Point of Contact with the login credentials that you would have received in your email (mail would have been received at < dharmendra.pathak@cdgi.edu.in>)
2. Appoint educators that you had shared in the note and have them accept the Program guide – see attached snap for AWS Academy Foundation Level curriculum – nominate for this curriculum only currently unless you have instructors certified for advanced curriculum. Also chose English only as the preferred language.
3. Ask your educators to complete the mandatory online module that has been designated to them
4. Run one complete batch of students
5. Post the year academy gets listed on the AWS Global Web site

My colleague, our India Technical Manager Mr Vishram conducts a weekly orientation call for which your Academy will be invited once your educators are added.

Ping for any clarifications
