

## Call for papers

### **AI-SPARK 2026**

*International Conference on Artificial Intelligence for Smart Progress in Advanced Research & Knowledge*

AI-SPARK 2026 invites original, high-quality research papers from researchers, academicians, industry professionals, and students across the globe. The conference aims to bring together leading experts to explore recent advances, practical challenges, and future directions of Artificial Intelligence and its transformative role in engineering science and advanced technologies.

The conference provides a multidisciplinary platform covering theoretical foundations, algorithmic developments, system architectures, and real-world applications of AI in engineering, smart infrastructure, sustainable technologies, healthcare, energy systems, and intelligent decision-making. Emphasis is placed on innovative, data-driven, and AI-enabled solutions that address contemporary engineering problems and societal needs.

All submitted papers will undergo a rigorous peer-review process to ensure originality, technical quality, and relevance. Accepted and presented papers will be considered for publication in reputed conference proceedings, subject to publisher and indexing guidelines. Selected high-quality papers may be invited for extension in indexed journals.

Researchers are encouraged to contribute to this forum that fosters collaboration, innovation, and global knowledge exchange in the era of intelligent engineering.
